RESPONSE TO NOTICE TO FILE CORRECTED APPLICATION PAPERS

Dear Sir:

15 In response to the Notice to File Corrected Application Papers mailed August 20, 2001, Applicants respectfully submit the following Preliminary Amendment:

PRELIMINARY AMENDMENT

20 **In the Drawings:**

Please substitute Figures 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11 as filed on August 2, 2001, with the enclosed substitute drawing sheets Figures 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11.

Please add the following as the Abstract of the Disclosure after page 24 of the application as filed and as the last page, page 25, of the above-identified application:

--ABSTRACT OF THE DISCLOSURE

30 The present invention provides a system and method for improving the performance of general purpose processors by expanding at least one source operand to a width greater than the width of either the general purpose register or the data path width. In addition, the present invention provides several classes of instructions which cannot be performed efficiently if the operands are limited to the width and accessible

number of general purpose registers. The present invention provides operands which are substantially larger than the data path width of the processor by using a general purpose register to specify a memory address from which at least more than one, but typically several data path widths of data can be read. The present invention also
5 provides for the efficient usage of a multiplier array that is fully used for high precision arithmetic, but is only partly used for other, lower precision operations.--

Thus, Applicants respectfully submit that the substitute drawing sheets for Figures 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11 comply with 37 CFR 1.84. Applicants respectfully submit that no new matter has been added by the replacement of the sheets of drawings.
